Beautiful, yet easily maintained urban gardens can be difficult to design and implement. It is all too easy to spend a lot of money on a garden or roof deck in the city, only to get results that begin to fade after a few weeks.

At Erdman Design, we partner with you on solutions that provide beautiful and maintainable results to make your properties look their best. Here are some before and after examples:

If you have properties whose front gardens or roof decks need a redesign, or just need freshening up, we'd love to talk with you. Our services span

- Front and back gardens
- Urns and window boxes
- Roof decks and poolside
- Courtyards and patios
- Accent lighting
- Irrigation options

We also offer maintenance programs, and all our projects are managed to clear budgets with timelines that don't leave loose ends.

At Erdman Design, we set ourselves apart with

- Customized design and services to fit your needs (and budget).
- Accountability – all communications are with the company president.
- No cookie-cutter results. Your garden won't look the same as a dozen other properties on the street.
- End-to-end timely and professional execution.

We also have solutions for realtors seeking to enhance the curb appeal of units and properties being prepared for market.

Please visit our website at [www.erdman-design.com](http://www.erdman-design.com) to see more examples of our work.

Then call us to arrange a complimentary meeting to discuss your needs and how Erdman Design can help!
